How to search by Spatial Query

- EMAGE is used to archive and spatially map gene expression patterns from a variety of sources including, large in situ hybridisation screens (EurExpress, FaceBase), the GXD and the published literature as well as unpublished direct submissions from developmental biology labs.

- Gene, Anatomy, and Embryo Space queries allow the user to find gene expression patterns easily.
• For a spatial query, click on **Embryo Space** and do the following.

**Select a Theiler Stage**

**Paint a region**

**View list of entries, click on an EMAGE ID for more details**
